SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Oroville Dam Auxiliary Spillway Incident

On 04/29/17 at 1344 hours the Department of Water Resources (DWR) advised the California State Warning Center (CSWC) that they will begin decreasing flow to the Feather River on 05/01/17.

- DWR continued decreasing flow to the Feather River on 05/01/17 at 0900 hours. Flow in the Feather River Low Flow Channel (the channel through Oroville) gradually decreased from 28,000 cfs to 3,500 cfs.
- Total flow to the Feather River will gradually decrease from 35,000 cfs to 8,000 cfs by 05/02/17 at 1500 hours.
- Hyatt Powerplant outflow will increase from 0 cfs to 8,000 cfs.
- The Oroville Dam Flood Control Spillway flow will be curtailed from 35,000 cfs to 0 cfs.
- These changes are necessary to manage Lake Oroville's water surface elevation and to safely close the Flood Control Spillway.
- DWR anticipates operating the Flood Control Spillway once more this season and will send an additional notification as we approach that time.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/01/17 at 0900 hours](#):

- Inflow: [21,943](#) cfs.
- Outflow: [34,928](#) cfs.
- The current lake elevation is [834.71](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

Tower, Vegetation Fire, San Bernardino County (New/Final)

Location: Cleghorn Road east of I-15, north of the community of Devore, San Bernardino National Forest

Jurisdiction: FRA

Start Time: 04/30/17 at 1603 hours

Per CAL FIRE and Cal OES Duty Officers as of 05/01/17 at 0937 hours:

- 200 acres, 50% contained
- Fire is being handled with local Initial Attack Forces.
- Per the San Bernardino County OES Duty Officer, they are monitoring the fire.
- There are no unmet emergency management issues at this time.
- No request for assistance at this time
- CAL FIRE ground and air resources assigned

Jameson, Vegetation Fire, Riverside County (New/Final)

Location: Temescal Valley area of Riverside County

Jurisdiction: LRA / SRA

Start Time: 04/30/17 at 1833 hours

Per CAL FIRE and Cal OES Fire Duty Officer (FDO) as of 05/01/07 at 0937 hours:

- 12.5 acres, 100% contained

SITUATION SUMMARY

Cal OES SOUTHERN REGION (Continued)

Opera, Vegetation Fire, Riverside County

Location: Moreno Valley area of Riverside County

Jurisdiction: LRA / SRA

Start Time: 04/30/17 at 1543 hours

Per CAL FIRE and Cal OES Duty Officers as of 05/01/17 at 0937 hours:

- 1,350 acres grass and brush, 60% contained
- The fire is being handled by Initial Attack forces.
- No request for assistance at this time
- Unified command with Riverside City Fire Department
- Precautionary evacuations only
- Continued threat to structures in the Belvedere Heights area

Deployments

- 1 Cal OES Fire Assistant Chiefs

Resources Assigned

- 2 Local Government Strike Teams
- 1 OES Strike Team

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be above flood stage at 4.8 feet the morning of [05/01/17](#).
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

Mariposa County:

- Merced River at Yosemite at Pohono Bridge is forecast to be at or above flood stage at [10.2](#) feet the [evening](#) of [05/02/17](#).
 - Potential Impacts: Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Sutter County: Sacramento River at Tisdale Weir, Sacramento River at Fremont Weir
- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- Yolo County: Yolo Bypass at Lisbon
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevenson, San Joaquin River at Newman

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

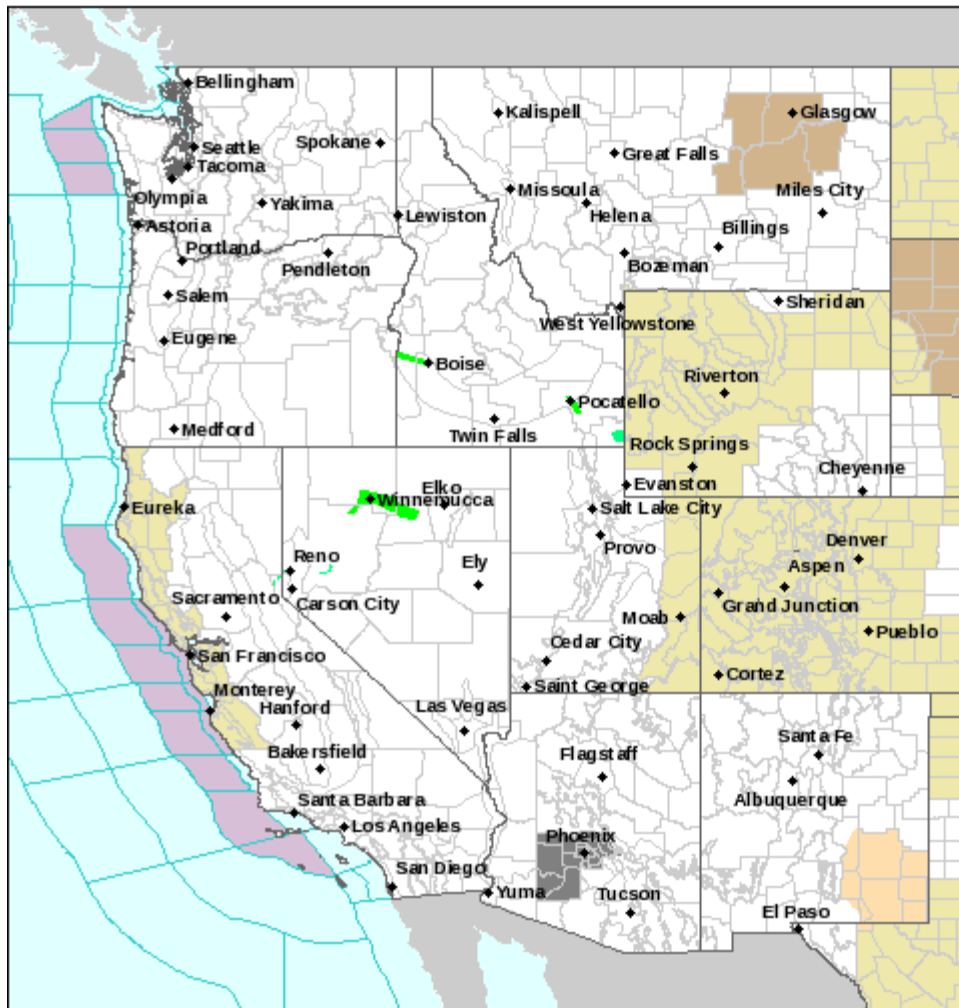

NORTHERN CALIFORNIA

A high pressure ridge will continue to get stronger over the region for a few days. Overall, there will be sunny skies and warming temperatures. There may also be periods of cloudiness in the northern areas as well through mid week. One big weather story will be the unseasonably warm temperatures through Thursday that will peak Wednesday with the warmest values of the year so far. Afternoon highs Wednesday will be as much as 15 degrees above normal inland with the warmest valleys in the low and mid 90s. A few afternoon and evening mountain thunderstorms could develop as early as Wednesday, but the chances for that will be higher and become a bit more widespread Thursday through Saturday as the ridge weakens and a low pressure trough moves into the region. Much cooler temperatures will be in place Friday through the weekend with the warmest inland areas dropping into the lower 70s, which will be about 5 degrees below normal. Winds will mostly be northerly this week except for some southerly to westerly winds later Thursday into Friday, and they may become somewhat strong and gusty at times over the weekend.

SOUTHERN CALIFORNIA

A ridge of high pressure approaching the California Coast will bring a slow warming trend along with minimum humidity in the teens away from the coast through Thursday. Maximum temperatures will be in the upper 60s and 70s across the mountains and 80s to low 90s in the valleys today. An area of low pressure will drop south off the West Coast bringing a significant cooling trend and increase in humidity Friday through this weekend. Isolated showers and thunderstorms will occur over the Central Sierra Thursday and Friday as southerly flow aloft develops. Showers and thunderstorms will become more numerous and cover the entire area this weekend as the low pressure area moves ahead. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday night through Saturday evening.
